Web Development | Design

Ambitious web developer eager to work for a company that is passionate about building and optimizing beautifully designed web experiences. Self-directed and coachable with excellent leadership skills and traditional work ethic. Dedicated to developing user-friendly websites from start to finish by balancing a creative eye for design with fantastic analytical skills. Passionate and self-motivated to become the best full-stack developer possible.

Student of Web Development and Design *IUPUI | January 2020 – present*

- Boosted my knowledge in web development by creating a database-driven PHP web application implemented with a MySQL database. Created effective tables in a database, coded all pages, created an Adobe XD prototype, and styled all pages which resulted in a beautifully crafted online storefront with advanced features.
- Exceeded in leadership by organizing team meetings and delegating roles for each team member. Improved the outcome of web projects by taking initiative and helping team members configure software, troubleshoot software and debug code.
- Developed a higher understanding for building successful algorithms and the importance of being resourceful.
- Further enhanced my development skills by building many static websites by following a wireframe provided by instructors. Created my own prototypes for personal and team projects using Adobe XD.

Bartender | Bar Manager *Jack of the Wood | Asheville, NC | 2017 – 2020*

- Improved the pub by optimistically leading a team, keeping proper liquor inventory, exhibiting excellent problem-solving skills, making quick decisions that would lead to the best possible outcome, keeping all employees on task, organizing paperwork, communicating consistently and effectively with all departments, and providing excellent customer service in a fast-paced/high-volume environment.
- Enhanced the overall workflow and increased sales by giving the best training to over 20 new employees in time-management, business etiquette, computer skills, menu details, and organization skills.
- Expanded performance of all servers and bartenders by creating functions in the computer system that accurately stored inventory of all food, liquor, and retail items.
